

INSERT DUMP BODY

IDB400 / IDB7500

GENERAL SPECIFICATIONS

IDB400

Vehicle: ¾ ton + pick-up
 Truck Length: 6.5 feet
 Weight: 650 lbs.
 Capacity: 1.5 cubic yards

IDB7500

Vehicle: ¾ ton + pick-up
 Truck Length: 8 feet
 Weight: 750 lbs.
 Capacity: 2.24 cubic yards

- 3.5" bore cylinder(s)
- Grease fittings for 13 pivot points
- Tethered control box (9' cord)
- Double acting tailgate for metered control of material
- Battery and pump shield for added protection for battery and pump
- Standard bolt-on cab shield

With the Magnum Insert Dump Bed for pick-ups, you can easily convert your standard ¾ ton + pick-up truck into a high performance dump truck. Now you can load and dump material with your standard pick-up truck without the expense of a dedicated dump truck.

Features	Benefits
Performance Advantages	
Converts pick-up into a dump body	Increase productivity from existing equipment
Tethered control box	One hand control for all bed movements
Twin lift cylinders	Improves load stability, reduces stress on hoses/hydraulics
Productivity Advantages	
Six stack pockets	Allows for added capacity
Double acting tailgate	More precise control of material during unloading operation
4,000 to 7,500 lb. lifting capacity	Carry more material, reduce number of loads

MONARCH POWER UNIT WITH CABLED CONTROL

Operated with a tethered controller.

TWIN LIFTING CYLINDERS

Provide maximum lift capability, while improved stability reduces the stress on the hoses and hydraulics. Competitive models typically feature one cylinder designs that twist and break during heavy usage.

DOUBLE ACTING TAILGATE FOR ADDED VERSATILITY
